

## Christ Church Christiana Hundred

Greenville, Delaware

Our experience with Christ Church can only be described as a study in contrast. At one moment it is a beautiful representation of its history, while at the same time it now accommodates its members' needs for ADA compliance and useful space. The work, too, was a contrast, requiring the artful skills needed to blend new stonework with the old and high levels of technical skill to match the old steeply pitched roof with a new steel-structured one. Our work there included a 9,900 square foot addition, housing classrooms and multiuse space for large gatherings, as well as an outdoor brick paver courtyard and several new parking areas.
