

Pine Valley Golf Club

Pine Valley, New Jersey

The cottages seen here at this lovely private golf club were constructed to accommodate overnight guests. Each cottage consists of four private bedrooms and baths, with a great room for everyone to gather and exchange their experiences. The construction of an interior post and beam with an exterior summer cottage look presented unique timing challenges because the client did not want the construction of this project to hinder the golf season in any way. Therefore, construction began in the fall, or off-season for the club, and was completed by the time golf season resumed in the spring.
