

Stonegates Retirement Community and Health Care Center

Greenville, DE

The Stonegates Retirement Community was on the forefront of modern-style retirement facilities upon the completion of the original cottages in June, 1985. The \$8,000,000 project included 88 two- and three-bedroom cottages, offering the residents independent living with maintenance support. Over the years, many original residents as well as new ones have requested SC&A to complete renovations to their cottages, the latest in 2008.

SC&A returned to work on the site to add a new wing onto the Health Care Center with architect, Moeckel Carbonell. This facility, completed in early 2000, accommodates community residents who require a greater level of care and features a private family dining area, two-room suites for couples and a physical therapy treatment room.
